

## Flange Jointing

Flange joints are a long established, non-proprietary means of connecting pipes and fittings, usually in above-ground situations. This method is well known and needs very little elaboration other than to advise the sequence for tightening the bolts and the recommended torque settings.

When using a Rilsan/Sheraplex protected type joint set, you will no longer need to protect the joint set by using denso tape or similar.

NP16 bolt sizes									
Dia	No of bolts	Ductile/Ductile size & length	Ductile/Steel size & length	Steel/Steel size & length	Ductile/PE		Spanner size
